

## Four uncompressed video channels and eight independent audio channels all transmitted digitally over a single fiber

The FiberLink 7142 Series digitally transmits four uncompressed video channels and eight independent audio channels over one multimode or single mode fiber at 1310 nm . Video channel is compatible with NTSC, PAL or SECAM video standards.

Audio channels may be configured independently by the user to have either balanced or unbalanced inputs and outputs.

## FEATURES

4 Video Channels and 8 Audio Channels over Fiber

Ideal for multi-camera classrooms, distance learning / videoconferencing broadcast

Transmits over multimode or single mode fiber at 1310 nm

No adjustments; pure digital processing and transmission

7 MHz video bandwidth
Video channel is compatible with NTSC, PAL or SECAM video standards

18-bit audio sampling; 20 Hz to 20 kHz audio bandwidth

Audio channels may be configured independently by the user to have either balanced or unbalanced inputs and outputs

Indicator LEDs monitor video signals, audio signals and power

Universal input internal power supply

Compatible with FiberLink Matrix \& FiberLink 8200 Series

Unit stands 1 RU high-Rackmount ears are included
